PROFESSIONAL SUMMARY

Full-stack developer with proven expertise in Java, Spring Boot, Hibernate, React.js, and Oracle SQL building scalable web applications and high-performance RESTful APIs from day one. Grounded in MVC architecture and backend-to-frontend engineering, I bring a sharp eye for clean, maintainable code and a track record of solving complex technical challenges efficiently and having Strong problem- solving skills. I am actively seeking an entry-level role where I can contribute meaningfully to engineering teams building real-world, user-centric software products.

SKILLS

Programming Languages:	Java, Python, JavaScript, SQL, C, C++
Backend Technologies:	Spring Boot, Hibernate, JPA, JDBC, REST APIs, Maven
Frontend Technologies:	HTML5, CSS3, JavaScript, React.js, Axios
Database:	Oracle Database (SQL)
Tools & Platforms:	Git, GitHub, Postman, Eclipse, VS Code
Core Java Concepts:	OOP, Collections Framework, Exception Handling, MVC Architecture

EXPERIENCE

Full Stack Developer Intern | Maxgen

Pune | Mar 2026 – Present

- Gained hands-on experience in Full Stack Development using **Java, Spring Boot, React.js, My SQL, HTML5, CSS3, JavaScript, and Bootstrap.**
- Built RESTful APIs and backend services using Spring Boot, **improving application performance** and scalability by **30%**.
- Implemented CRUD operations, database integration, validation, and exception handling with **95% successful execution rate.**
- Improved debugging and problem-solving efficiency by reducing common **application errors by 40%.**
- Worked with **Git & GitHub** for version control, collaboration, and project management in Agile-based development environments.

PROJECTS

CareFlow: Hospital Platform

Tech Stack: Java, Spring Boot, React.js, Hibernate, Spring Data JPA, Oracle SQL, REST APIs, Axios

- Developed a full-stack Hospital Management System web application **using Spring Boot and React following RESTful architecture.**
- Implemented complete CRUD functionality for **managing Doctors, Patients, and Appointments** using **Spring Data JPA and Hibernate.**
- Built REST APIs** for seamless communication between frontend and backend.
- Implemented **validation, exception handling,** and basic authentication mechanisms to ensure **data integrity and application reliability.**
- Applied MVC design principles and modular architecture to maintain **clean, reusable, and maintainable code.**

TicketWave: Online Ticket Booking

Tech Stack: HTML, CSS, JavaScript, SpringBoot, Hibernate, MySQL

- Developed **Ticket Wave**, an online ticket booking application using Java, Spring Boot, Hibernate, MySQL, HTML, CSS, and JavaScript..
- Implemented **user authentication, event search, ticket booking, and complaint management** functionalities through RESTful APIs.
- Performed **CRUD operations, validation, exception handling,** and **database management** to ensure smooth application performance.
- Developed secure **user authentication and authorization features,** enabling safe access to booking and complaint management functionalities.

EDUCATION

Deogiri Institute of Engineering and Management Studies

B.Tech

Aurangabad, Maharashtra

Jan 2021 - Sept 2024

CERTIFICATION

Java Full Stack Developer Training

FullStack Guru IT Solution

Pune, Maharashtra

Jan 2025 - Mar 2026
